

AmpliSource™

SHRINK YOUR ENVIRONMENTAL FOOTPRINT

While Making Your Food & Beverage Byproducts Useful!

Food Byproducts From Manufacturing Processes

Animal Feed, Compost, Anerobic Digestion, and/or Land Application

AmpliSource turns your *excess* food and beverage byproducts into the *exceptional*. And as a **single-source, total waste and recycling partner,** we handle everything else too.

Partner with AmpliSource...

- We offer sustainable, compliant food & beverage waste recycling solutions, capable of 100% diversion from landfills
- We deliver substantial savings on your food disposal bills
- We extend the usefulness of your food byproducts
- We provide flexible and customizable complete byproduct management
- We help companies meet their sustainability goals by transforming their residuals into sustainable products such as animal feed, compost, renewable natural gas, soil amendments/ fertilizer, and more

Through it all, we'll work with you to reach your sustainability goals, supplying reports, and cost-effective solutions to reduce your greenhouse gas emissions and carbon footprint.

RECYCLING CAPABILITIES
